Afraid of Crypto

Afraid of Crypto, written by C*u*Bit™ founder Sudato O'Benshee openly discusses both the terrible dangers of cryptocurrency and how C*u*Bit™ is designed to protect you from those problems.

Implemented correctly and honestly, cryptocurrency is a great opportunity for nearly everyone. Done wrong, it is just one more way to con you out of your wealth.

The unfortunate reality is that regulators, economists, bankers, and politicians all know what it takes to create a stable currency that resists in ation. Unfortunately, they have no incentive to protect your wealth. They want to convert your money into their money. Making themselves wealthy, at your expense. In ation and volatility are two ways they do that.

Applying his many years of banking, risk management, regulatory, and information technology experience Sudato O'Benshee, and his team, created C*u*Bit™ to do what the regulators, politicians, economists, and bankers refuse to do. C*u*Bit™ is the world's rst totally fungible cryptocurrency that is backed by real estate.

When you use C*u*Bit™ to protect your wealth, you won't ever be afraid of crypto again. Getting one free C*u*Bit™ along with your copy of Afraid of Crypto is only using this link.
